Subject: ATSDR "Short Term" Health Advisory for MCHM

All,

On behalf of Vik Kapil of ATSDR, attached is an ATSDR-revised "plain language" "short-term" HA for the chemical spill in WV. This morning, WV is reporting all samples as non-detect at a reporting limit of 10ppb. If you could please have a look at the ATSDR final draft and identify any "show stopping" edits that might need to be made prior to release, I will pass those along to ATSDR.

The attached language is to be posted on the ATSDR website within 24 hours or less.

Sorry for the short notice and thanks again.

Chris
